INSTRUCTOR: JUN ANSALDO BURLAS

Table of Contents

01 Definition of Arnis

02 History of Arnis

03 Founder of Modern Arnis

04 The "Arnis Law" or Republic Act 9850

ARNIS

- also known as "**Kali**" or "**Eskrima**"
- official **national sport** and the **martial art** of the Philippines
- the sport also includes **hand to hand combat, grappling, joint locks** and **weapon disarming techniques**
- a form of martial arts that focuses on **weapon-based fighting** with knives, sticks, bladed weapons and some improvised weapons

ARNIS

ARNISADOR

Male practitioners of the sport

ARNISADORA

Female practitioners of the sport

Weapons in arnis

Rattan

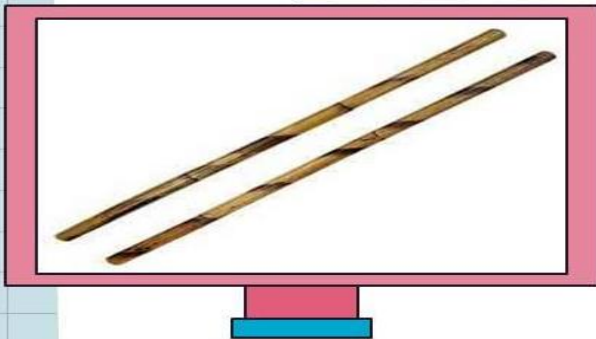

Knives

Bladed weapons

Primary weapon

- the rattan stick, called a cane or baston (baton), which varies in size, but is usually about 28 inches (71 cm) in length
- both single and double stick techniques are taught, with an emphasis on the former; unarmed defenses against the stick and against bladed weapons (which the stick is sometimes taken to represent) are a part of the curriculum

FUNDAMENTAL OF

ARNIS ESKRIMA KALI

AS A SPORTS

BRIEF HISTORY OF ARNIS, ESKRIMA & KALI

Arnis, Kali, Eskrima is the common terms used to refer to the Filipino art of armed and unarmed combat fighting. The differences in terms can be attributed to regional dialects among others. **Guerrero Arnis De Mano (2016)**

ARNIS

Moro-moro, also called **comedia**, the earliest known form of organized theatre in the Philippines; it was created by Spanish priests, to facilitate the spread of Christianity, (*E. Britannica, 2023*).

ESKRIMA

In the Visayas, the generic term used for the Filipino Martial Art is “Eskrima” which is the Spanish word for sword fighting.

KALI

There are many theories on why the Filipino Martial Art is called as Kali in the southern part of the Philippines that includes the Mindanao region.

One theory is that, the southern Filipinos uses a snake like sword that is called as “Kalis” or otherwise known as the Kris, making use of the sword name to refer to the martial art that it is used for.

KALI

Other Theory:

KA - KAMOT (HAND)

LI - LIHOK (MOVEMENT)

KALI - HAND TO HAND COMBAT FIGHTING

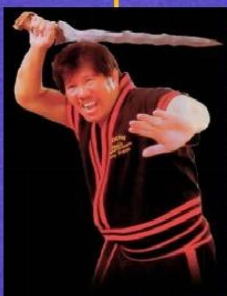

Aside from the main terms - ***Arnis, Kali and Eskrima***, here are some of the non-exhaustive minor terms that are used in different dialects:

kaliradman (Ilonggo), pagkalikali (Ibanag) and kalirongan (Pangasinan), baston (Tagalog).

FILIPINO MARTIAL ARTS

ARNIS

PROF. REMY AMADOR PRESAS
Father of Modern Arnis

ESKRIMA

CIRCIACO "CACOY" CAÑETE
One of the Founder of Doce Pares Eskrima

KALI

ANTONIO "TATANG" ILUSTRISIMO
Founder of Kalis Ilustrisimo

HISTORY

- Initially, the sport was practiced by the **peasant or commoner class**, but those practitioners lacked the scholarly knowledge to create any kind of written record.

history

1975

The first national organization for Arnis is the National Arnis Association of the Philippines (NARAPHIL) which was founded in by **Gen. Fabian C. Ver**

its existence faded post the Philippine Revolution

1986

history

two major types of Arnis practiced as sports are the system followed by:

1986

Arnis Philippines (ARPI) was established

WEKAF (World Eskrima Kali Arnis Federation) was established

1989

MODERN ARNIS FOUNDER

03

Who is it?

REMY AMADOR PRESAS

Modern Arnis Founder

- Born on December 19, 1936
- Born in the town of Hinigaran, Negros Occidental, Philippines
- son of Jose B. Presas and Lucia Amador
- Presas was married twice, first to Rosemary Pascual Presas, with whom he had five children, and to Yvette Wong, with whom he had two children
- died on August 28, 2001 in Victoria, British Columbia, Canada from brain cancer

REMY PRESAS

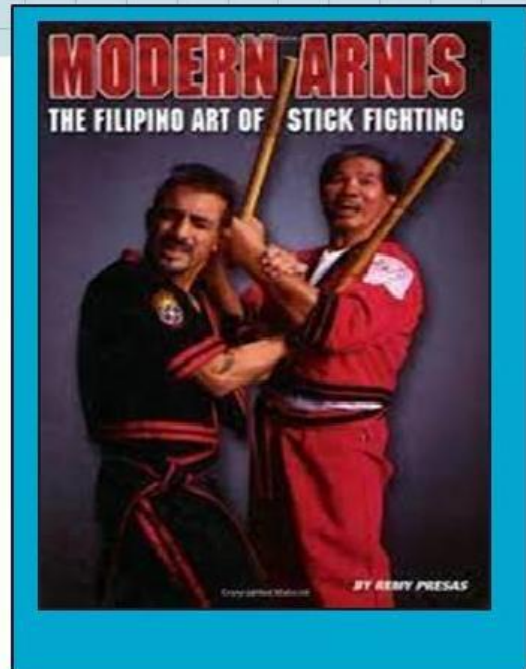

- He began studying arnis with his father then with his grandfather, Leon Presas, and uncle at the age of six.
- By the age of fourteen he had his first stick fighting match with a Sinawali master that Presas knocked out with one stick hit.
- Presas eventually focused on Balintawak Eskrima, but earned a 6th degree black belt in Shotokan Karate and a black belt in judo
- In 1966 Presas began developing his own system which he called "Modern Arnis" by identifying the basic concepts of the numerous systems he had learned and merging them
- By 1969 Modern Arnis had been approved by the Philippine Amateur Athletic Federation as a regular subject to be taught at the National College of Physical education.

MODERN ARNIS

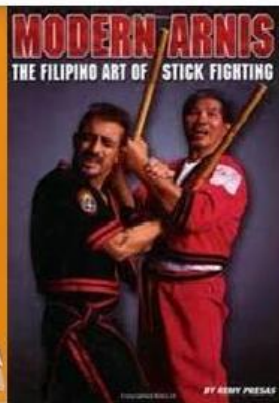

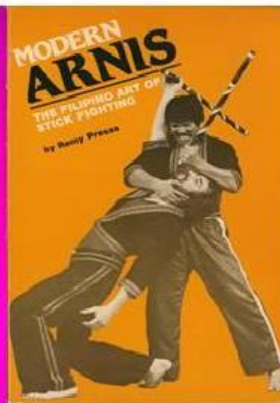

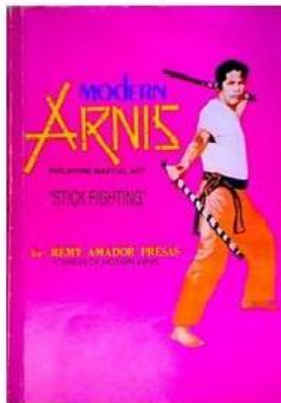

Modern Arnis is the system of Filipino martial arts founded by the late Remy Presas as a self-defense system.

- His goal was to create an injury-free training method as well as an effective self-defense system in order to preserve the older Arnis systems
- It is derived principally from the traditional Presas family style of the Bolo (machete) and the stick-dueling art of Balintawak Eskrima, with influences from other Filipino and Japanese martial arts.

MODERN ARNIS: FILIPINO ART OF STICK FIGHTING

THE PRACTICAL ART OF ESKRIMA

THE "ARNIS LAW" aka REPUBLIC ACT #9850

What is it?

04

Republic Act No. 9850 a.k.a.

Arnis Law

AN ACT DECLARING ARNIS AS THE NATIONAL MARTIAL ART AND SPORT OF THE
PHILIPPINES

*Be it enacted by the Senate and House of Representatives of the
Philippines in Congress assembled:*

Section 1. It is the policy of the State to inculcate patriotism, nationalism and appreciation of the role of national heroes and symbols in the historical development of the country. Furthermore, the State must give priority to education, science and technology, arts and culture, and sports to foster patriotism and nationalism, accelerate social progress, and promote total human liberation and development.

Republic Act No. 9850 a.k.a.

Arnis Law

AN ACT DECLARING ARNIS AS THE NATIONAL MARTIAL ART AND SPORT OF THE
PHILIPPINES

Section 2. Definition of Arnis. – Arnis, also known as Eskrima, Kali, Garrote and other names in various regional languages, such as Pananandata in Tagalog; Pagkalikali, Ibanag; Kabaraon and Kalirongan, Pangasinan; Kaliradman, Bisaya; and Didja, Ilokano, is an indigenous Filipino martial art and sport characterized by the use of swinging and twirling movements, accompanied by striking, thrusting and parrying techniques for defense and offense. This is usually done with the use of one (1) or two (2) sticks or any similar implements or with bare hands and feet also used for striking, blocking, locking and grappling, with the use of the same principle as that with the canes.

Republic Act No. 9850 a.k.a.

Arnis Law

AN ACT DECLARING ARNIS AS THE NATIONAL MARTIAL ART AND SPORT OF THE
PHILIPPINES

Section 3. Arnis is hereby declared as the Philippine National Martial Art and Sport. The official adoption of arnis as the national martial art and sport shall be promulgated by inscribing the symbol of arnis in the official seal of the Philippine Sports Commission and by making it as the first sport competition to be played by participating teams on the first day in the annual Palarong Pambansa. The Philippine Sports Commission shall be the lead agency to implement the provisions of this Act.

Republic Act No. 9850 a.k.a.

Arnis Law

AN ACT DECLARING ARNIS AS THE NATIONAL MARTIAL ART AND SPORT OF THE PHILIPPINES

Section 4. The Department of Education, the National Commission for Culture and the Arts, and the Philippine Sports Commission shall promulgate the necessary rules and regulations to carry out the provisions of this Act.

Section 5. Any provision of law, decree, executive order, rule or regulation in conflict or inconsistent with the provisions and/or purposes of this Act is hereby repealed, amended or modified accordingly.

Section 6. This Act shall take effect fifteen (15) days after its complete publication in the Official Gazette or in at least two (2) newspapers of general circulation.

Republic Act No. 9850 a.k.a. Arnis Law

AN ACT DECLARING ARNIS AS THE NATIONAL MARTIAL ART AND SPORT OF THE PHILIPPINES

Approved,

PROSPERO C. NOGRALES

Speaker of the House of Representatives

JUAN PONCE ENRILE

President of the Senate

This Act which is a consolidation of Senate Bill No. 3288 and House Bill No. 6516 was finally passed by the Senate and the House of Representatives on October 14, 2009.

MARILYN B. BARUA-YAP

Secretary General House of Representatives

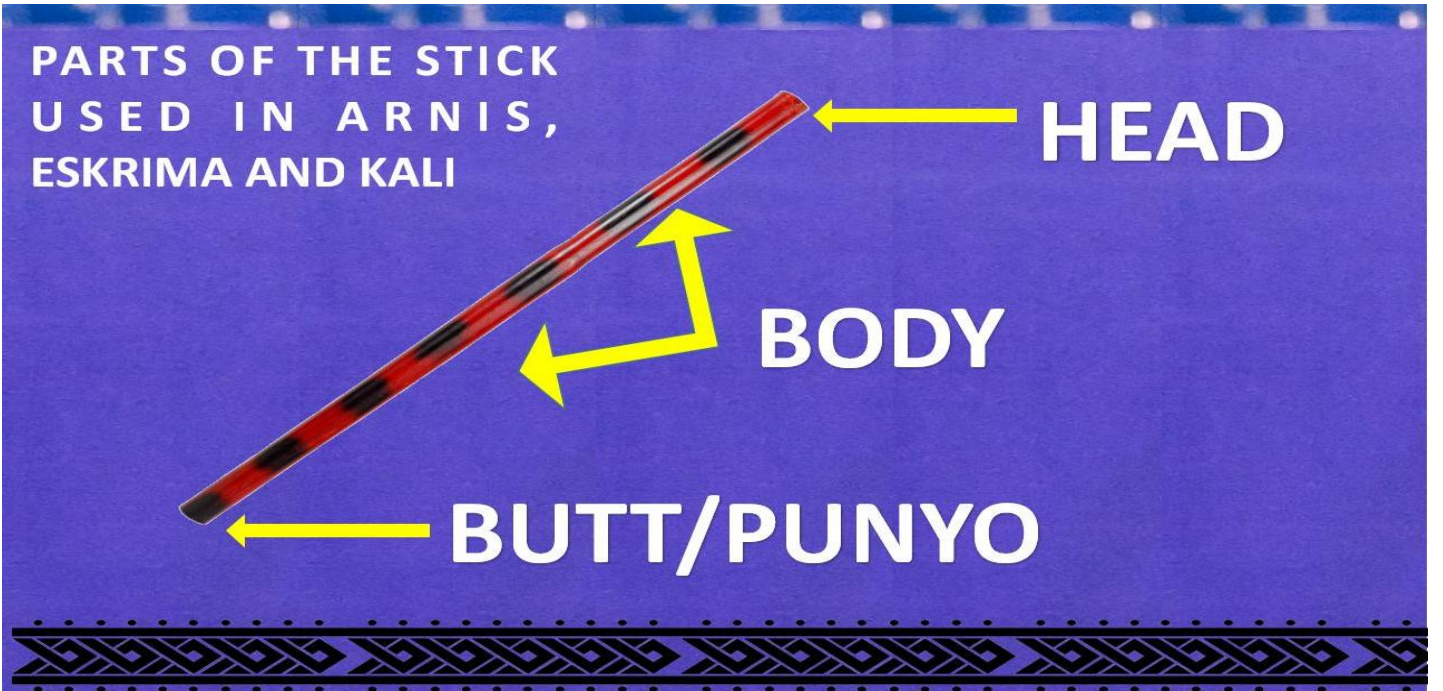

Approved: DEC. 11, 2009

EMMA LIRIO-REYES

Secretary of the Senate

GLORIA MACAPAGAL-ARROYO

President of the Philippines

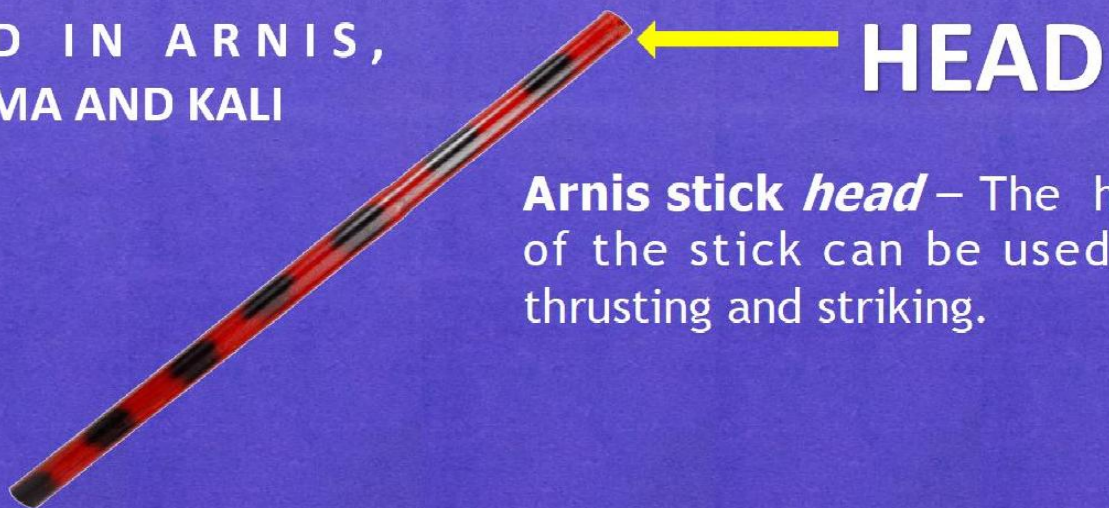

PARTS OF THE STICK
USED IN ARNIS,
ESKRIMA AND KALI

BODY

Arnis stick *body* - The body of stick is used to block a strike or counter either by clashing against the strike or by deflecting the strike.

PARTS OF THE STICK
USED IN ARNIS,
ESKRIMA AND KALI

HEAD

Arnis stick *head* – The head of the stick can be used for thrusting and striking.

PARTS OF THE ARNIS STICKS AND ITS USES

We will now examine the parts of an **Arnis stick** and compare it with its bladed counterparts such as bolo, parangs or long bladed swords. Aside from the bladed weapons being pointed at the tip and has sharp edges, there is not much of a difference on how the both long bladed weapons and sticks can be used. In fact, I always tell my students to visualize the stick as a bladed weapon when practicing both striking and blocking techniques. Knowing where the cutting side and blunt side of a weapon and applying it to the stick as if it was a bladed weapon will also contribute to develop proper striking and blocking form.

1. Arnis Stick Head- the head can be used for thrusting and striking. Like blades that has a pointed head that can pierce through, the sticks

concentrates the force of the thrust to a small area giving it the same piercing effect although it does not really pierce through.

The stick head is also the ideal part that is used for striking, due to the law of potential energy, when a strike is delivered most of the potential energy is concentrated at the end of the stick (which is the head of the stick) therefore impact is greater as opposed to hitting with the body of the stick.

2. Arnis Stick Body- for bladed weapons, the body of the sword will be either the edged side, blunt side or flat side. The stick does not possess this kind of characteristics as it is round and blunt. However, the stick body has many uses this includes blocking. The body is used to block a strike or counter either by clashing against the strike or by deflecting the strike. The body of the stick can also be used for locking the hands, the elbow and the shoulder, locking using the stick mostly effective when it is leveraged against a joint or a pressure area.

Another use of the stick body is chocking. Chocking with the stick can be more effective than chocking with the forehand, this is because the forehand still has a fleshy part while the stick is a hard material that can immediately induce pain when pressed against the neck area.

Other uses of the stick body can be for throwing and clinching the opponent.

3. Arnis Stick Butt - the butt of an Arnis stick is an interesting part of the stick, because as small as it is, it can do damage when used effectively. I recommend utmost 2 inches distance from the tip of the butt to the tip of the hands, anymore length will get in the way and lessen your reach.

The butt of the stick can be used in butt strikes which are usually done to eye and face area on the head area, while on the body, the butt strike is delivered in the ribs and solar plexus area. In the lower body area, butting is usually done to the groin area. Other uses of the stick butt is to parry or clearing tool, as grabbing or pulling tool, for disarming and to apply pressure to a vital pressure point.

On part 3 of this series, we will be discussing the types of Arnis sticks that can be used for stretching and power generation, for drills and techniques development, and for demonstration and competition.

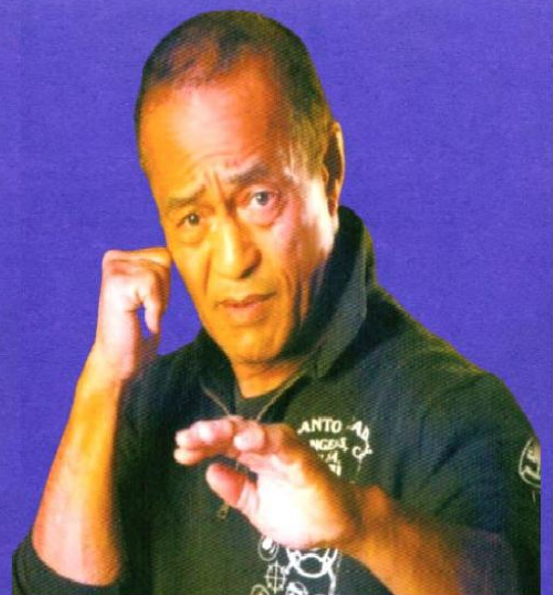

FOUR FORMS OF FILIPINO MARTIAL ARTS - ARNIS, ESKRIMA & KALI

Filipino Martial Arts utilize four different styles of fighting

EMPTY HAND

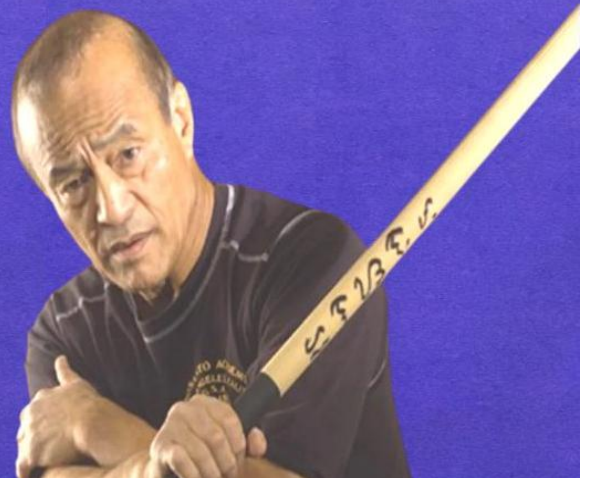

A martial art that allows the use of punches, kicks, elbows, and open-hand moves like joint locking, and grappling.

Filipino Martial Arts utilize four different styles of fighting

SOLO BASTON

Means single with the same length of the bolo is used in training.

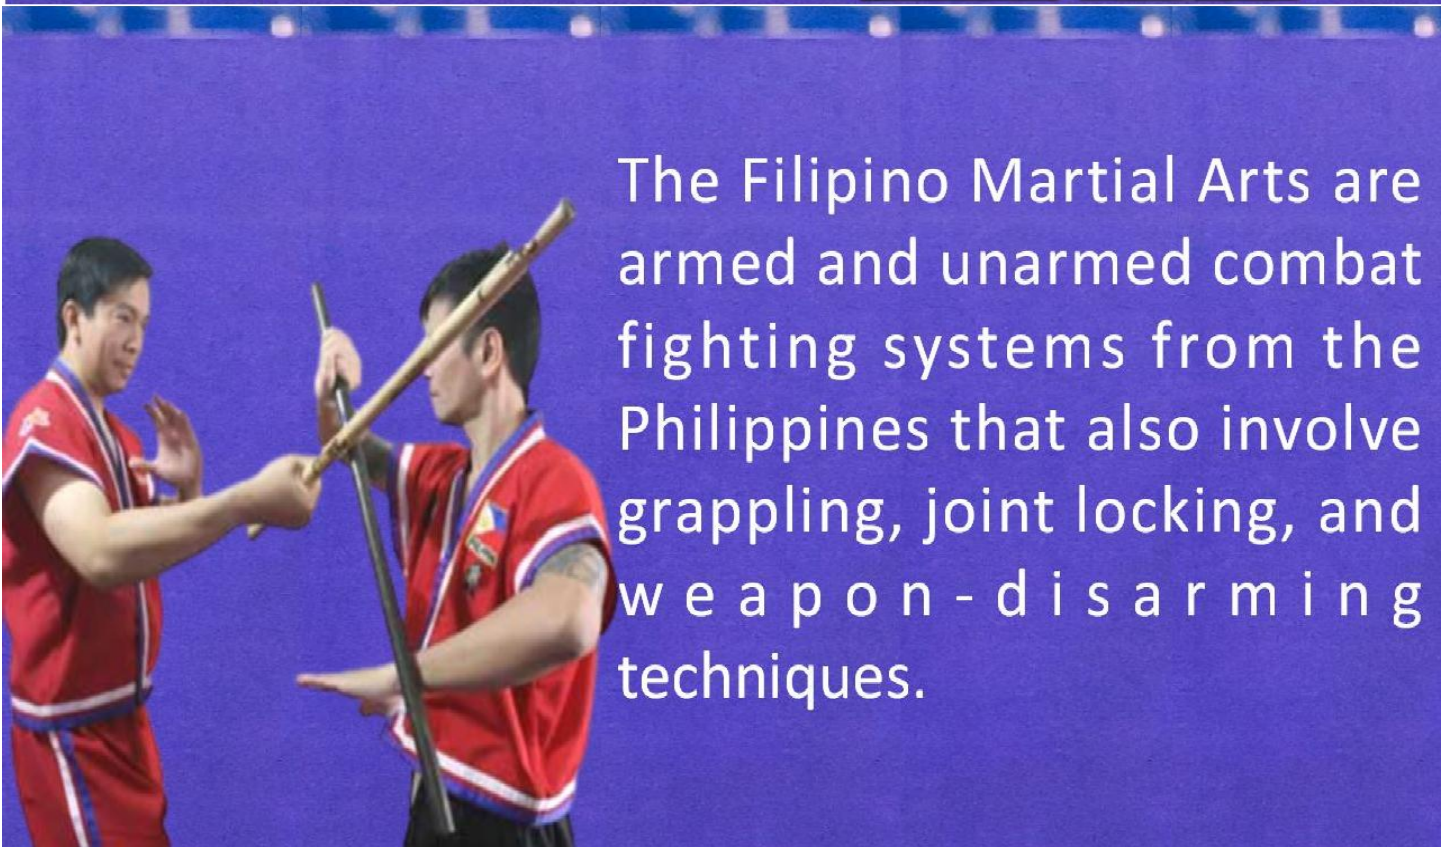

DOBLE BASTON

Means two sticks of the same length of the bolo were utilized.

SPADA Y DAGA

means single edge bladed weapon and a knife, for practice purposes a long stick and a short sticks are used.

The Filipino Martial Arts are armed and unarmed combat fighting systems from the Philippines that also involve grappling, joint locking, and weapon-disarming techniques.

FOUR KINDS OF PUGAY

EMPTY HAND

PUESTO POSITION Standing in the ready position, your feet should be slightly pointed outward, and your fist should be closed.	HANDA SA PAG PUGAY Standing with your feet together, your left arm at your side, your right hand in a closed fist over your left chest, and your body and head straight up.	PUGAY * Bow , b y bending your neck and answer “Po!”	PUESTO POSITION Return to the pwesto position after that.

SOLO BASTON

PUESTO POSITION Stand with your legs shoulder-width apart and your toes pointed slightly outward. Holding a stick in front of your body.	HANDA SA PAG PUGAY Your left arm should be at your side, your feet should be together, and your right hand should be holding the stick with the tip pointed up above your left chest.	PUGAY * Bow , b y bending your neck and answer “Po!”	PUESTO POSITION Return to the pwesto position after that.

DOBLE BASTON

PUESTO POSITION

Stand with your legs shoulder-width apart and your toes pointed slightly outward. Holding a stick in front of your body.

HANDA SA PAG PUGAY

Stand with your feet together, your right hand holding a sticks that is pointed upward above your left chest, your left arm holding a sticks that is parallel to the ground and at shoulder level. Look far.

PUGAY

* Bow , b y bending your neck and answer “Po!”

PUESTO POSITION

Return to the pwesto position after that.

SPADA Y DAGA

PUESTO POSITION

Stand with your legs shoulder-width apart and your toes pointed slightly outward. Sword & knife is held in front of your body.

HANDA SA PAG PUGAY

With your feet together and your right hand holding a sword that is pointed up above your left chest. Knife extended to the side with the left arm, parallel to the ground, and at shoulder level. Look far away with your head and body straight.

PUGAY

* Bow , b y bending your neck and answer “Po!”

PUESTO POSITION

Return to the pwesto position after that.

KINDS OF STANCES AND FOOTWORKS

READY STANCE

- With both of your toes facing forward, stand with your feet apart and parallel to your shoulders.
- The body should be facing forward with the waist and knees straight.
- Hands should grasp the sticks on both sides while being at waist level.

ATTENTION STANCE

- Stand with your feet together. Heels should be close to each other, knees should be straight, the waist and body facing forward.
- Shoulders are dropped to the side and both hands are at waist level.
- The Attention Stance is commonly used in preparation for courtesy or “bowing” at commencement of sparring.

RIGHT & LEFT FORWARD STANCE

- Starting with the ready stance, move one foot forward until the knee and the toe are in line to each other. Both toes are pointing in front, the waist and the body is facing forward.
- Distribute the weight or center of gravity to both legs.
- Forward stances can be right foot lead, which is the Right Foot Forward Stance or it can be left foot lead which is Left Foot Forward Stance. Forward Stance are commonly used with frontal striking or blocking techniques.

RIGHT & LEFT OBLIQUE STANCE

- Starting with the ready stance, move one foot forward 45 degrees away from the body until the knee and the toe are in line with each other.
- Move in the same direction as the lead foot (e.g. for right foot lead, move 45 degrees forward to the right). Both toes are pointing in front, and the waist, and the body are facing forward.

RIGHT & LEFT BACK STANCE

- Starting with the ready stance, move one foot backward 45 degrees away from the body.
- Back stances are used for blocking and backward evasion techniques.

RIGHT & LEFT SIDE STANCE

- Starting with the ready stance, move one foot about two feet (2') to the left or right direction.
- Moving foot will be perpendicular to the ground while the other leg is extended thereby creating a position like that of a side kick.
- Both toes are pointing in front, the waist and the body is facing forward.

Stances - Filipino Martial Art Way

Stances, according to Webster dictionary, are a “way of standing or being placed”. For martial artists, it is not only a way of standing or being placed, stances are a way of remaining standing and maintaining balance while moving or on a steady position. Like a tree that has roots to make it stand firm and steady even when under attack by winds and storm, solid and correct stances serves as the “root” for martial artists that keeps him standing. Having the correct stance not only makes the martial artist stable and balanced, it also develops form and enables ease of maneuverability. Even though **Filipino Martial Arts** stances are presented in this article, the stances can also be applied to any martial arts that has a standing position.

Stances develops form and power

Correct form is important for a martial artist to be able to deliver powerful strikes and blocks, however, the foundation of a correct martial arts form is a correct stance. Training for a proper form starts with the consciousness of the correct stance, body shift and hand placement that will be used for the technique. It can be considered that correct stance brings about correct form and correct form gives power to every strike and block that is delivered.

Stances maintains stability and balance

Stances enables the martial artist to maintain stability and balance when doing a particular technique or a sequence of techniques. By knowing the correct stance, the body weight or center of gravity is perfectly placed to either the front leg (as in the case of forward stances), back leg (as in the case of back stances) or in the middle (as in the case of straddle stances). Through consistent practice of the techniques with a proper stance, the martial artist will be able to switch the body weight dynamically thereby avoiding being outbalanced by the opponent.

Stances for maneuverability

Another purpose of stances is for maneuverability. Maneuvering or going from one position to another is achieved through a sequence of steps or proper foot placement - that is basically a sequence of stances. In martial arts, there are many kinds of maneuvers or footwork that includes “striking maneuvers”, “blocking maneuvers” and “evasive maneuvers” just to name a few. But regardless of the maneuver that will be done, there will always be an initial stance from whence the maneuver will come from and an ending stance where the maneuver will stop. So knowing which stances to use to maneuver from place to another is as important as the technique itself.

Basic strikes of Filipino Martial Arts

KINDS OF STRIKES USED FOR ANYO FORMS

1. FOREHAND & BACKHAND STRIKES

- TEMPLE
- (R/L) Shoulder
- (R/L) Knee

2. SUNGKITI (THRUSTING)

- EYES
- CHEST
- STOMACH

3. BUTT/PUNYU

- R/L TEMPLE
- FRONTAL

KINDS OF STRIKES USED FOR ANYO FORMS

4. EKIS/ X- STRIKES

- Diagonal Downward Motion

5. ALDABIS/BARTIKAL RODOBLE/ OTSO-OTSO

- Diagonal Downward Motion

6. BANDA Y BANDA/ PLANSTA STRIKES

- Horizontal Inward & Outward Motion
- Diagonal Downward Motion

KINDS OF STRIKES USED FOR ANYO FORMS

7. ARKO/ARCO/DOBLETE/SAN MIGUEL STRIKES

- Horizontal Inward & Outward Motion
- Diagonal Downward Motion
- Upward Motion - outward & inward

8. ROMPIDA STRIKES

- Vertical Downward & Upward Motion
- Horizontal Inward motion

These are the commonly used in different system in the Filipino Martial Arts. Sample Photos or Video's below show the basic strikes used in the Filipino Martial Arts.

EKIS STRIKE (X – STRIKES)

- FROM THE ON GUARD POSITION or FORWARD STAND POSITION.
- Strike or slash the swords using a diagonal motion downward towards the opponent

ALDABIS STRIKES (REVERSE EKIS STRIKE)

- FROM THE ON GUARD POSITION or FORWARD STAND POSITION.
- Strike or slash the sword using a diagonal motion upward towards the opponent.
- Apply this technique to counter or attacking the opponent when the hand is in downward position.

BANDA y BANDA STRIKES (SIDE BY SIDE STRIKE)

- FROM THE ON GUARD POSITION or FORWARD STAND POSITION.
- Strike or slash the sword using an inward & outward horizontal motion towards the opponent.
-

ROMPIDA or VERTICAL STRIKES.

- FROM THE ON GUARD POSITION or FORWARD STAND POSITION.
- Strike or slash the sword using a vertical motion upward and downward towards the opponent.

ARCO/ARCO STRIKES (INWARD & OUTWARD STRIKES)

- FROM THE ON GUARD POSITION or FORWARD STAND POSITION.
- Strike or slash the sword using an inward and outward Circular motion towards the opponent.

ARNIS SINAWALI

Sinawali is the double-cane method of fighting of arnis, escrima and kali. The name sinawali came from the Tagalog word "sawali," a woven split bamboo mats used as walls of nipa huts. The crisscrossing movements of sinawali weapons fighting mimic the pattern of these mats hence the name.

The high-speed nature of sinawali drills is good for developing fast reaction. The rapid-fire contact of sticks in these drills will sharpen one's awareness of motion. Developing the strength and coordination of both hands is another benefit of sinawali training. Most of these drills teach the practitioner to relate the movement of the weak hand to that of the strong hand hence promoting ambidexterity.

SINGLE SINAWALI APPLICATION

Posture of fighting stance, Execute a forehand strike (target the left temple) with your right hand, then a backhand strike (target the right knee) with your right hand, and vice versa with your left hand.

1. Fighting stance Position

2. Strike the left temple with the right hand.

3. Strike the right knee with the right hand.

Posture of fighting stance, Execute a forehand strike (target the right temple) with your left hand, then a backhand strike (target the left knee) with your left hand, and vice versa with your right hand.

1. Fighting stance Position

2. Strike the right temple with the right hand.

3. Strike the left knee with the left hand.

ADVANCE SINGLE SINAWALI APPLICATION

Strike the left temple with the right forehand, then lay it on the left shoulder, strike downward to the right knee, return to the left shoulder, and strike the right temple with the left hand.

1. Strike the left temple with the right forehand.

2. Strike the right knee with the right backhand.

3. Strike the right temple with the right backhand.

Strike the right temple with the left hand, then lay it on the right shoulder, strike downward to the right knee, return to the right shoulder, and strike the right temple with the left hand.

4. Strike the right temple with the left hand.

5. Strike the left knee with the left hand.

6. Strike the left temple with the left hand.

DOUBLE SINAWALI APPLICATION

1. Strike stance with the left backhand inward of the right body position, position the right forehand ready to hit.

2. Strike the left temple with the right forehand.

3. After that, place it on your left shoulder.

4. Striking downward to the left knee from a left backhand inner body position.

5. follow through to the ready forehand striking position when you strike your left backhand on the left knee target.

6. Strike the right temple with the right backhand.

7. Place your left backhand inward of your left torso after striking the right temple.

8. Strike the right temple with the left forehand.

9. After that, place it on your right shoulder.

10. Striking downward to the right knee from a right backhand inner body position.

11. Follow through to the ready forehand striking position when you strike your right backhand on the left knee target.

12. Strike the left temple with the left backhand.

13. Return to Strike stance, with the left hand backhand inward of the right body position and the right forehand poised to strike.
